About ICASAT

Founded in 2005, ICASAT is an official Satellite Access Provider (SAP) and leading service provider in Iran. The company obtained SAP license from CRA ministry of telecommunication of Iran and served various customers in diverse vertical markets such as oil & gas, maritime, banking and financial, enterprise and crisis management. ICASAT offers plenty of satellite-based services that triggered broadband and flexible with wide geographical coverage networks.

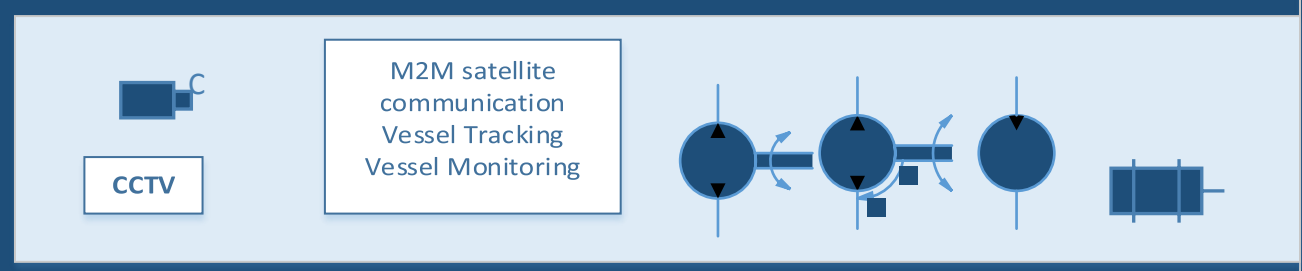

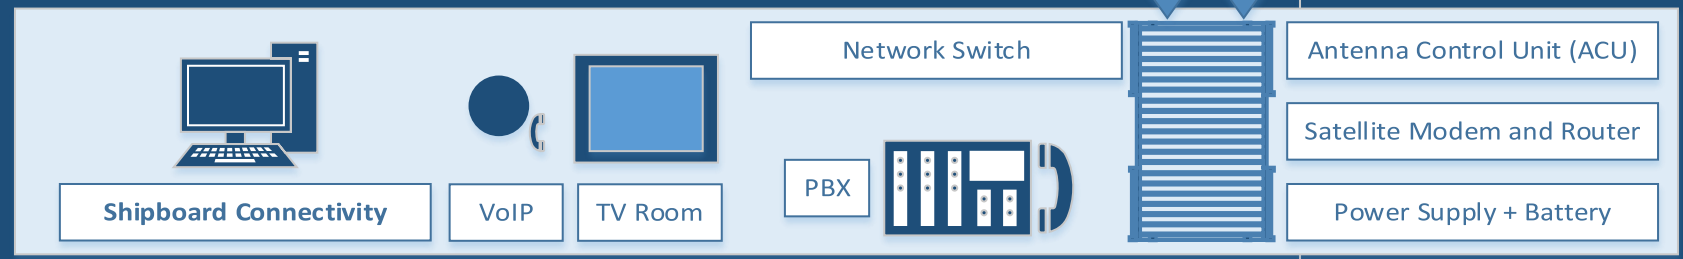

3-Axis Auto-Stabilized TVRO Antenna

3-Axis Auto-Stabilized VSAT Antenna

Wide Coverage and High Quality Satellite Beams with Multiple Satellite and Coverage Support

Satellite Communication Overseas Environment

Because connectivity brings safety, accessibility and entertainment, due to the wide coverage and high bandwidth of satellite communications, this technology is far beyond satisfaction. Marine vessels shake and quake periodically but with advanced auto-tracking and stabilization satellite antennas, we can confirm a reliable communication link.

ICASAT Value-Added Services

- After establishing satellite network, many services come into scene that provides beneficial communication. These services include:
- Voice over IP (VOIP)
 - Internet connectivity
 - Video conferencing
 - File sharing and efficient e-mail and fax
 - TV over IP (IPTV)
 - SCADA
 - CCTV

Central Hub
Star-Point to Point- Mesh Network Configuration
DVB-S2/ACM
Redundant Design
Fiber-Optic Connection to internet Backbone
Automatic Beam Switching Capability
